Data Sheet

DOE, JOSEPH
 12/31/1925
 1111 Main Street
 Main City 99999

Risk Profile
 anticoagulation
 allergic to penicilline

Vaccination Status
 tetanus until 2001

Blood Type
 0 zero Rh positive

Organ Function Profile
 CNS
 Heart
 Blood Vessels
 Lungs - Bronchial Tract
 Kidneys - Urinary Tract
 Liver - Biliary Tract
 Gas - Intestinal Tract
 Pancreas
 Gallbladder
 Blood - Coagulation
 Endocrine System
 Metabolic System
 Immunological System
 Peripheral Nervous System
 Skin - Mucous Membranes
 Skeleton - Muscles - Connective Tissue
 Eyes - Throat - Nose - Ears
 Teeth Status

Diagnoses
 infrarenal abdominal aortic aneurysm (4.5 cm)
 compensated renal insufficiency
 diabetes mellitus type 2
 hypertension
 peripheral occlusive arterial disease 1st right high
 absolute arrhythmia
 duodenal ulcer until 1977

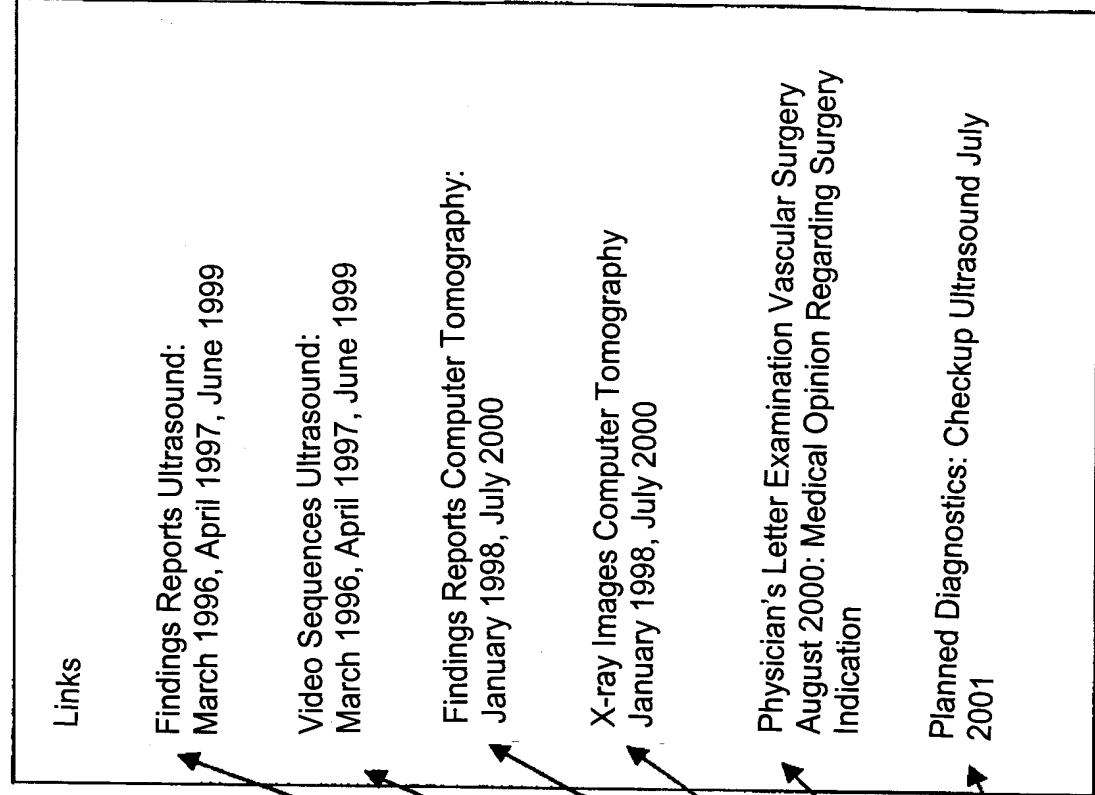

Operations - Interventions
 Bassini hernia right 1959
 cholecystectomy 1968
 gastric resection 1977

Symptoms - Differential Diagnosis

Current Therapy
 dioxone 0.2 mg 1-0-0
 phenprocoumon tablets 1-0-0

Current Diagnostics
 blood sugar
 quick/INR
 ultrasound control aortic aneurysm

Social and Care Status
 living alone, no relatives
 no care

Diagnosis: infrarenal abdominal aortic aneurysm | (4.5 cm)
